PREVENT CHILD ABUSE AND NEGLECT BY
PROTECTING CHILDREN AND STRENGTHENING
FAMILIES!

Nationwide, thirty to fifty percent of children found in methamphetamine labs test positive for the drug in their urine. With such an alarming statistic, it is impossible to ignore the correlation between methamphetamine use and production and child abuse and neglect. PCA Illinois' focus is to spread awareness of the destructive effects of methamphetamine on children and families as part of our agency's mission to protect children and promote healthy families. Learning about the harmful effects of methamphetamine can help your agency or program protect children too.

Training Highlights

- △ Meth and its Effects
- △ Prenatal Exposure to Meth
- △ Neglect and Abuse Risks to Children Exposed to Meth
- △ Pinpointing Warning Signs of Children Exposed to Meth
- △ Laws, Legislation, and Research Surrounding the Meth Issue
- △ Efforts to Combat the Meth Issue
- △ Summary of Drug Endangered Children Protocol

PCA Illinois' Methamphetamine Initiative is made possible by the ALCOA Foundation
